

NEW

Mixing Cups | Sample Cups

Labmixer b.v. offers a completely new line of disposable laboratory cups made of bio sugarcane material. No fossil raw materials are used for the Green Bio Cup® and they are 100% recyclable.

The cups are supplied as standard in white transparent and are smooth on the inside without welding seams. The Green Bio Cups can be used for various industrial products such as:

- Paint
- Color pastes
- Ink
- Glue
- Resin
- Additives
- Cosmetics
- Creams
- Pharmaceutical
- Sealants
- LED & Battery paste
- Compounds

The Green Bio Cups are also suitable for all high speed mixers in your laboratory.

If you are interested, we will send you a number of Green Bio Cups for **FREE** and without any obligation, so that you can test the Green Bio Cup® for resistance with your specific product.

Have a Green day!
