

Syringe Barrels

Syringe barrels with consistent internal diameters that maintain an airtight seal with pistons to ensure accurate, consistent fluid deposits, eliminating the need to deal with messy blow-by, pressure variation, or contamination. Available in 3cc, 5cc, 10cc, 30cc, and 55cc capacities, These syringe barrels are moulded from a proprietary blend of polypropylene, to provide exceptional clarity and chemical compatibility. Manufactured in certified silicone-free facilities and are certified for industrial use.

If you are interested, we will send you a number of syringes for **FREE** without any obligation, so you can experience the quality of our product on your liquid.

Order No.	Description / item No.	Weight
